

3040-Series Colorimetric Wet Section Upgrade

Future-proof your Waltron 3040-Series Colorimeter with an easy update to the latest 3140-Series Wet Section features

The Easiest and Most Cost-Effective Way to Extend the Life of Your Existing Analyzer

It's never been easier or more cost-effective to bring the latest advances in product engineering to your site. This easy, pre-assembled upgrade kit is designed for rapid replacement with minimal down time. Once installed, you will experience all the benefits of Waltron's new quick change maintenance design. Without changing your analyzer installation, benefit from modern engineering with increased durability, reliability, and easier maintenance.

The all-new 3040-Series Wet Section Upgrade is engineered to bring your existing 3040-Series analyzers to the latest design, delivering unparalleled reliability, simplified maintenance, and lower cost of ownership. Designed with the operator in mind, the new compatible 3140-Series Wet Section comes as a preassembled kit with an easy slide-in design for rapid replacement, minimizing future downtime with quick-change, tool-less, EasySwap™ pump heads and tubing maintenance.
